## Community Update

### Calibre Metals Pty Ltd Wagga Wagga Lithium-Ion Battery Recycling Facility Project

This letter provides an update to the community on the development of Calibre Metals Pty Ltd (Calibre Metals) proposed Lithium-Ion Battery (LIB) Recycling Facility which involves fit out of a newly constructed industrial building at 61 Edison Road, East Wagga Wagga, within the Flip Screen Industrial Estate (see Figure 1 map below).

**Figure 1** Map showing proposed project site location

#### Project update

An Environmental Impact Statement (EIS) was prepared by GHD on behalf of Calibre Metals to support a State Significant Development Application for the Wagga Wagga LIB Recycling Facility, which assessed the potential environmental, social, economic and cumulative impacts associated with the proposal.

The EIS was placed on public exhibition and submissions were received from the community, government agencies and organisations.

A Response to Submissions is currently being finalised to address submissions made during the exhibition process. To view a copy of the EIS and the Response to Submissions, on the Department of Planning, Housing, and Infrastructure's Major Projects portal please use the QR code, below.

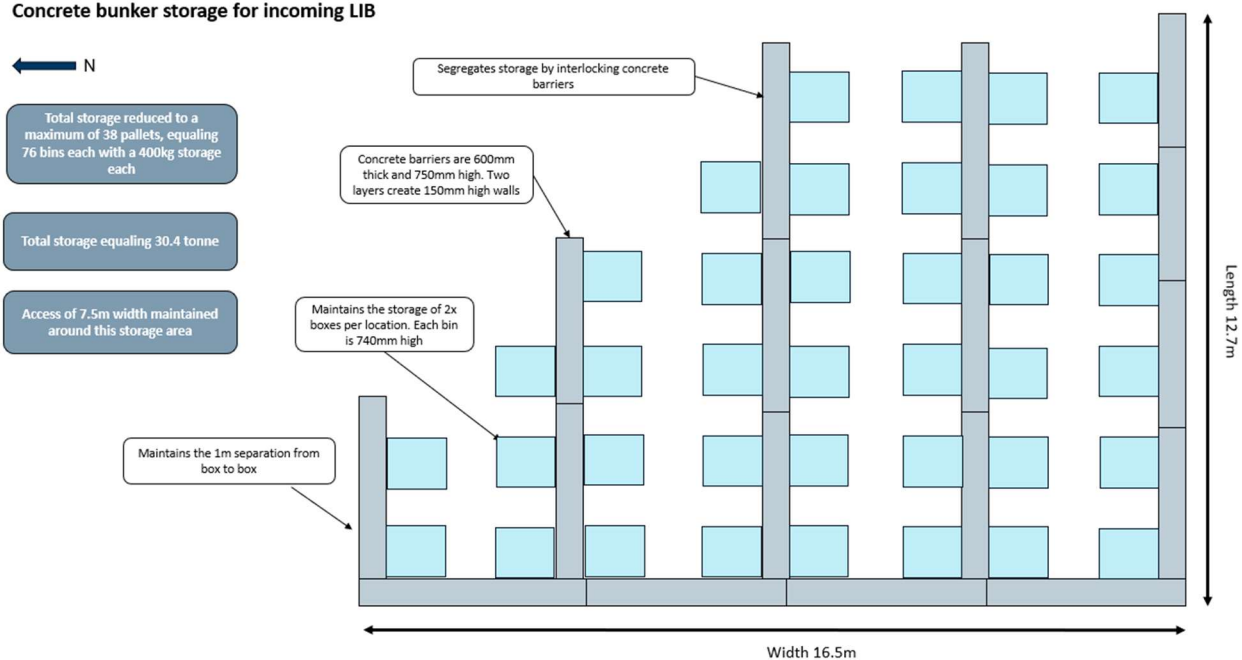

Several refinements to the proposal have been made in response to the submissions received, in particular in relation to hazards and risks, including;

- A reduction in the amount of waste LIB stored on site prior to processing from 52.8 tonnes, down to 30.4 tonnes.
- Adjustment to the LIB storage area to allow for a six metre emergency access buffer around the full perimeter of the site.
- Storage of incoming waste LIB will be within concrete bunkers, segregating the storage area into four separated sections using 1.5-metre-high, 600-millimetre-thick concrete walls, with a maximum of 9.4 tonnes in the largest bunker as shown in Figure 2.

**Figure 2** Updated LIB storage
